Do you need to review if you are saving in the right places? If so, consider saving in the following order: contribute to your employer's retirement plan to take advantage of the employer match, max out HSA contributions (if participating), max out employer retirement and IRA contributions (if applicable), save in taxable accounts.		
Are you taking distributions from your retirement accounts? If so, consider the rate of withdrawal and the tax efficiency of your distribution strategy. Ensure that any RMDs are satisfied.		
 Do you expect your cash flow will change in the future? If so, consider the following: If you expect your income to increase in the future, consider making Roth conversions during lower tax bracket years and harvesting capital gains. If you expect your income to decrease in the future, consider making traditional IRA and 401(k) contributions, and utilizing tax losses during higher bracket years. If income will vary (due to deferred compensation or bonuses), consider aligning your high tax years with higher tax deductions (such as charitable gifts and medical expenses) and taking advantage of any tax losses. 		
Do you expect to receive Social Security in the future? If so, consider reviewing Social Security statements, and, if you will receive a pension from a state or federal government, determine whether you will be subject to the Windfall Elimination Provision and Government Pension Offset. If married, consider your spouse's Social Security benefit and review strategies to maximize household benefits.
